Category: Entrepreneurship & Tech Leadership

Target Audience: Women Tech Entrepreneurs

1. Introduction

Welcome to **ExpertCoursExemple**. This foundational guide is engineered for domain experts, developers, and creators transitioning into business leadership. It provides a structured roadmap to turn technical knowledge into a viable, market-ready enterprise.

2. Core Pillars

- **Value Proposition:** Defining your unique market position and expert offer.
- **Execution Strategy:** Moving from high-level vision to scalable operations.
- **Growth & Branding:** Building dynamic authority and client engagement.

3. Module Breakdown

Module 1: The Founder Shift

Reframing technical skills into market value, overcoming imposter syndrome, and setting high-impact business goals.

Module 2: Monetizing Your Expertise

Creating high-ticket offerings, validating market demand, and closing your first B2B or B2C clients gracefully.

4. Prerequisites

- ★ Domain experience in tech, design, marketing, or consulting.
- ★ A preliminary idea for a product or professional service.
